I know it's early access, but. this is absolute garbage. The physics don't work, the sound doesn't work, you can't change the color of your ball. Your ball starts rolling immediately when the course starts. I'm willing to try out early access stuff and take a few bugs, but this is totally untested. One of the holes, you can't even get to the pin. If you go out of bounds, it returns your ball to the beginning of the course. Refunding.. Lots of potential with an integrated map editor and solid multiplayer. It was good fun amongst friends. Seems to be frequently updated with bug fixes and new content on the regular. It's for those who like these types of games! surely it is worth the small price of admission.. Lots of potential with an integrated map editor and solid multiplayer. It was good fun amongst friends.
